INDUSTRIAL ARTS & HOME ECONOMICS FACULTIES 2023

YEAR 8 INDUSTRIAL ARTS AND HOME ECONOMICS

The study of Technology Mandatory in Years 7–8 enables students to become responsible users of technologies and designers of solutions. Through the practical application of knowledge and understanding, students develop skills in the safe use of a range of technologies to design, produce and evaluate solutions to identified needs and opportunities.

SCOPE AND SEQUENCE 2022

Year 8 Program – Industrial Arts	Year 8 Program – Industrial Arts	Year 8 Program – Home Economics (20 weeks)
<p>Unit : Engineered Systems (Dragster)</p> <p>Focus: The Engineered Systems context focuses on how force, motion and energy can be used in systems, machines and structures. Students are provided with opportunities to experiment and develop prototypes to test their solutions. They learn how forces and the properties of materials affect the behaviour and performance of engineered systems, machines and structures. Knowledge of these principles and systems enables the design</p> <p>Outcomes: TE4-1DP, TE4-2DP, TE4-3DP, TE4-8EN, TE4-10TS</p>	<p>Unit: Material Technologies (Trinket Box)</p> <p>Focus: This unit involves students in the design, development and production of a timber Trinket Box. Students design their own timber Trinket Box and personalise their design. Safe and responsible use of materials, tools and techniques by students is essential in the Industrial Technology course.</p> <p>Students will develop an understanding of the timber industry and become familiar with the properties and characteristics of a range of timber types and products.</p> <p>Outcomes: TE4-1DP, TE4-2DP, TE4-3DP, TE4-9MA, TE4-10TS</p>	<p>Unit : From Paddock to Plate (Agriculture and Food including elements of digital technologies)</p> <p>Focus: The Agriculture and Food Technologies context integrates content from agriculture (food and fibre production) and food technologies.</p> <p>Agriculture (food and fibre production) focuses on the investigation of managed environments, such as farms and plantations. Students learn about the processes of food and fibre production and investigate the innovative and sustainable supply of agriculturally produced raw materials. Students develop knowledge and understanding about managed systems that produce food and fibre through designing and producing solutions.</p> <p>Food technologies focuses on the use of resources produced and harvested to sustain human life. Students learn about the characteristics and properties of food. Students are provided with opportunities to develop knowledge and understanding about food selection and preparation, food safety and how to make informed choices when experimenting with and preparing nutritious food.</p> <p>Outcomes: TE4-1DP, TE4-2DP, TE4-3DP, TE4-5AG, TE4-6FO, TE4-10TS</p>

All year 8 students complete THREE units during the year.

PS. These units are delivered by both, Home Economics and Industrial Arts Faculties.

LANGUAGES FACULTY 2023

YEAR 8 LANGUAGES

COURSE OUTLINE: Year 8 Languages students will study a range of topics. Students will explore bilingual texts that give an insight into the cultures of target languages in comparison with the Australian culture. They will also explore a range of social and cultural perspectives. They will study different types of texts and become conversant with the metalanguage required. They will also participate in a variety of activities that aim to develop their listening, speaking, reading and writing skills.
